

Empowering Healthier, Cashless & Frictionless School Breaks

A unified digital ecosystem connecting **Parents, Students, Canteen Vendors, and School Administration** to eliminate 15-minute recess queues, prevent life-threatening allergy cross-contacts, eliminate 35%+ canteen food waste, and deliver fresh wholesome meals directly to student classroom desks.

1. CURRENT SCHOOL CANTEEN CHALLENGES VS. SMART FOOD APP

✗ Current Canteen Bottlenecks

- **Chaotic Recess Queues:** Students lose 10–12 mins of their 15-min break in crowds.
- **Cash Loss & Hygiene Risks:** Cash mishandling and counter disputes among young kids.
- **Zero Allergy Visibility:** Canteen staff unaware of medical nut, dairy, or gluten sensitivities.
- **30–40% Food Wastage:** Kitchens cook on guesswork, causing high waste or stockouts.

✓ Smart Food App Transformation

- **Classroom Desk Delivery:** Pre-ordered hot meals delivered to desks before the bell.
- **100% Cashless Campus:** 1-Tap Campus Lunch Wallet & instant UPI payments.
- **Active Allergy Shield:** Hard stops on allergen conflicts + bold warnings on stickers.
- **Pre-Order Demand Forecasting:** Kitchens cook exact pre-ordered batches by cutoff.
